

KHANDELWAL INDUSTRIES

AN ISO 9001:2015 CERTIFIED COMPANY

|| Clear Mica Sheets ||

Clear mica sheets are typically made from muscovite mica, which can be split into very thin, flexible, and tough transparent sheets with a glass-like shine.

High-Temperature Resistance:

Mica sheets can withstand extreme heat and maintain their structural integrity and physical properties in high-temperature applications, such as in furnaces, electrical components, and as a heat barrier for burning resin incense.

Electrical Insulation:

Known for their excellent dielectric strength, they are effective barriers against electrical currents, preventing failures in sensitive electronic and electrical systems.
