

KHANDELWAL INDUSTRIES

AN ISO 9001:2015 CERTIFIED COMPANY

|| POLYESTER WOVEN TAPE: ||

Polyester Woven Tape is a high-quality tape engineered for a range of electrical insulation applications, such as SMPS transformers and electrical relays, withstanding temperatures up to 130°C. FGI Woven Polyester Tapes meet Class F specifications and feature heat-shrinkable properties that facilitate improved winding tightness, making them suitable for demanding environments.

FEATURES :

- Dimensionally stable
- Excellent di-electric strength
- High thermal resistance
- Good chemical resistance
- Good moisture resistance
- Good flexibility
- Good reinforcement to insulating varnishes
- Provides armor against mechanical damage
- Can cater to thermal class F (155°C)

Availability :

Available in multiple sizes
